FLEMING REQUEST: MICHIGAN DAILY
13 Feb 68SACUA To Weigh
Inquiry Into CIA

By STEVE NISSEN

President Robben W. Fleming has asked the Senate Advisory Committee on University Affairs to consider the possibility of investigating CIA activity on campus.

Fleming sent a letter yesterday to Prof. Frank Kennedy of the Law School, chairman of SACUA, asking for recommendations on whether there should be an investigation and, if so, how it should be conducted.

Fleming's request did not arrive in time for consideration by SACUA at its regular bi-weekly meeting. SACUA chairman Frank Kennedy said he had not talked to Fleming about the request.

In a related development, the executive committee of the Institute for Social Research met yesterday to discuss problems involving CIA activity in the institute.

According to ISR Assistant Director Stanley Seashore, the committee "reviewed the issue and decided not to take any action."

Seashore would not discuss any further details of the meeting nor would six other members of the committee who were contacted last night.

Student Government Council passed a resolution Thursday demanding the University conduct

a full investigation into the extent and nature of CIA activity on campus.

The resolution requests that the investigation be carried out by a joint committee of students and faculty. SGC demanded that the committee report its findings no later than March 15.

CIA contacts are "potentially harmful to the ISR," Prof. Arnold Tannebaum, program director of ISR, explained. "I think we should carefully think through a policy designed to minimize if not eliminate these contacts," he said.
